Strategies to Overcome Creative Block"Oblique Strategies" is a concept developed by Brian Eno and Peter Schmidt to help artists overcome creative blocks through lateral thinking. Now there is a new widget that will automatically set to light/dark mode. The developer does not collect any data from this app. Back then, writes Dangerous Minds' Martin Schneider, the concept for Eno and Schmidt's "set of 115 cards with elliptical imperatives designed to spark in the user creative connections unobtainable through regular modes of work" emerged as a form of "radical intervention with roots in Eastern philosophy." Having first come on the market in the 1970s, Oblique Strategies has gone through several different production runs, usually packaged in handsome boxes with the deck's name emblazoned in gold. It also began as thoroughly a physical experience, invented by producer-artist-ambient musician Brian Eno and painter Peter Schmidt, who first came up with them in the pre-digital days of 1974. You can now do that digitally, of course, but Oblique Strategies remains an essentially physical experience, one whose shuffling and drawing reminds the user that they're drawing from the well of chance for a way to break them through a creative impasse or just rethink part of a project. Privacy practices may vary, for example, based on the features you use or your age. It consists of a deck of cards, each one containing a vague or ambiguous phrase that can be used to solve a problem intuitively, by breaking conventional thinking patterns and interpreting it from a new perspective. This app aims to translate the essence of the original cards deck into a digital experience, making it accessible to a wider audience. Just wanted to let you know that the last version will now change the widget quote every day. Have a best creative day! A recent update seemed to have disabled dark mode for the widget—would love a fix. A few more ideas for improvement... The widget card and in-app card should always keep in-sync. Also, you can shake the iPhone for a new sentence. Long tap the screen to have the last sentence read to you again. With the addition of the 5th generation of cards in the latest version, this app has climbed to the top of the ladder! As a musician and photographer, this app stimulates my creativity and productivity immensely. Rebuilt and optimised for iOS 15. Learn More Developer Website App Support Privacy Policy In 2013 a limited 6th edition of 500 numbered sets were available but quickly sold out. At this moment, you can find one imported set on Amazon. Small changes, fixes and improvements implemented to make your experience even better. Follow him on Twitter at @colinmarshall or on Facebook. The total package of Oblique Strategies may have grown more refined over the years, but this handmade first set does have a certain immediacy, and also, in a sense, the imprimatur of history: after all, they worked for Brian Eno. Hi, Thank you for your review. It contains the original edition, as well as the newer decks, presenting them in a sleek minimalist style inspired by the original design of the cards. (Example: the widget updates each day, and when you open the app from same card should be displayed there—if you shuffle in the app the widget should match the new card too). The widget card should have a way to shuffle without opening the app or waiting a day—I suggest a little circle loop arrow dimmed and in the bottom center in the same position as the 'plus' in the app version. When you open the app please don't show a splash screen—just go straight to the current card text. Very good app—make it just a little tighter and you've got 5 stars. But it seems that the very first set of Oblique Strategies, featured in Schneider's post, is unavailable at any price. The Apple Watch version can run independently without needing the app installed on your iPhone. With VoiceOver, anyone with a visual impairment can have the Oblique Strategies phrase read to them. Written in Eno's own hand, sometimes cursive and sometimes block, on cards with a wooden-looking texture and without the rounded corners that characterize the commercial version, these first Oblique Strategies include "Don't be frightened to display your talents," "If a thing can be said, it can be said simply," and "Do we need holes?" Those who have followed Eno's work will surely appreciate in particular the card that says to "use non-musicians," "non-musician" being one of Eno's preferred titles for himself, especially when working in a musical capacity. For more information, see the developer's privacy policy. The home screen widget on iOS 14 allows reading a new quote every day without opening the application. It only changes when you go back and manually reopen the app. The developer, Nicolae Cherasin, indicated that the app's privacy practices may include handling of data as described below. I was surprised to see several Oblique Strategies apps in the store, and after trying them all I can say unequivocally that this is the best of the group - it offers the ability to switch between any combination of the four extant editions, it looks good, and it credits Eno and Peter Schmidt (which the others do not do). Update: Thanks for adding the widget option; however, the widget does not automatically update each day.
